

Today

Hiring Manager
Zip

Dear Hiring Manager,

Dear Hiring Manager, I am excited to apply for the Senior/Staff Software Engineer position at Zip. With over 5 years of experience in full-stack software development and a strong background in building resilient applications, I am confident in my ability to contribute to Zip's mission of simplifying procurement processes for enterprises.

In my role as a Full Stack Software Engineer at ClearEstate, I developed and enhanced features for an estate settlement platform using Laravel PHP and Vue.js. My efforts led to a 30

As a Co-Founder and Lead Developer at Cactus App, I architected a cross-platform loyalty rewards application that achieved over 10,000 downloads within the first three months of launch. I utilized React Native and Laravel PHP to create a seamless user experience, focusing on feature-rich functionality such as QR code point collection and rewards management. I also implemented CI/CD pipelines using GitHub Actions, ensuring efficient deployment processes that resonate with Zip's goal of quick and reliable product delivery.

I am eager to bring my technical expertise and innovative mindset to Zip and contribute to your rapidly growing team. I look forward to the opportunity to discuss how my background and skills can align with the exciting challenges at Zip. Thank you for considering my application.

Sincerely,

Andy Craig
